

LEED Product Information

Topakustik and Topperfo materials can be ordered in such a way to comply with your LEED building requirements. There are several credits that are possible for our products to apply towards, however, in most cases, it must be made clear at the time of quoting and/or purchasing which credits are required or desired.

Materials & Resources

Credit 7

Certified Materials

Topakustik cores and veneers are available in FSC® certified options. The FSC® claim is dependent upon what cores are available at the time of the order, but will typically be FSC® Mix 70% or FSC® Mix 80%. There may be an additional cost for FSC® certified products. Most veneers are available in FSC® options, but please keep in mind there are some species that are not available as FSC® certified at all.

The mark of responsible forestry

Indoor Environmental Quality

Credit 4.1

Low Emitting Adhesives

This credit is technically limited to the adhesives applied within the building envelope, and not at the manufacturing location. However, Topakustik uses adhesives and sealants that qualify as low emitting materials.

Indoor Environmental Quality

Credit 4.2

Low Emitting Finishes

This credit is technically limited to the paints and finishes applied within the building envelope, and not at the manufacturing location. However, Topakustik uses finishes and paints that are low VOC materials.

Indoor Environmental Quality

Credit 4.4

Low Emitting Materials

Topakustik and Topperfo products can be provided with composite wood cores that are manufactured with resins containing No Added Urea Formaldehyde (NAUF). There is an additional charge associated with these cores and it must be made known at the time of quote or order if NAUF materials are desired.
