Paints

White—RAL9010

Topakustik standard white paint is RAL 9010. RAL color series are considered standard options, however, any paint color can be matched. Please specify paint color and number and a color chip can be sent and matched on your product sample.

Veneer Matching

• Book Match - In book matching every other leaf of veneer is turned over just as the leaves of a book, producing a matching joint design or mirror image.

• Slip Match – veneer leaves are joined side by side, resulting in a repeat pattern of the grain pattern.

• Random Match - veneers are joined with the intention of creating a casual unmatched effect.

• Reverse Slip Match - similar to a slip match except that each alternate veneer leaf is reversed to the opposite end.
